Do you know what separates Flory off-ground products from the competition?

DESIGNED TO PERFORM

Flory Industries, COE OFF-GROUND product lineup is the most modern & innovative in the industry. Designed from the ground up with exclusive features & superior components that elevate it above the competition. This combination provides incredible performance & reliability at harvest.

ULTIMATE TREE SAFETY

SHAKE SMARTER NOT HARDER with the precision-controlled power of FLORY ESHAKE. Create unique shake patterns with automated repeatability, ensuring consistency, which protects your valuable crop producing trees.

SUPERIOR REMOVAL

Remove & recover more of your valuable crop in less time. A combination of the TH8 shaker head & our exclusive ESHAKE hydrostatic shake deliver the best removal results in the industry. Eliminate the variability of manual shaking with the advanced features only provided by FLORY.

CLEANEST PRODUCT

Our industry leading shake & removal also results in less trash to handle, which improves efficiency in the field & at the processing plant. Especially when combined with the effective de-sticker & efficient blower.

CONSISTENCY

What if you could clone your best operator? Well now you can with the INCONTROL & ESHAKE systems. Tailor machine adjustments to specific harvest needs & lock them in with password protection. Now your machines will perform the same no matter who is in the driver's seat.

RELIABLE POWER

Nothing runs like a Deere & that's why we have always specified Deere engines in our OFF-GROUND product line. This reliable power comes backed by the reliable John Deere global dealer network. No matter where in the world our products go you can be guaranteed John Deere support is close by.

MAXIMIZED EFFICIENCY

The POWER OF EFFICIENCY using Intelligent power management is standard on every one of our OFF-GROUND models. POWERMAX provides seamless performance by measuring & adjusting hydraulic demand to power availability. This maximizes performance while providing incredible fuel efficiency of 2 to 2.5 gallons per hour depending on model.

SAFETY FIRST

At FLORY INDUSTRIES our equipment is designed with safety in mind from the field to the maintenance shop. Advanced software, safety features, operational & maintenance manuals help provide peace of mind.

SUPPORT YOU CAN TRUST

Local dealers backed with factory support provide customers 24/7 coverage with more service techs & parts locations compared to other distribution styles. An ample parts supply is maintained to assure our customers have what they need year-round whether its maintenance or harvest time.

PARTS ADVANTAGE

Our OFF-GROUND models have a lot in common, including their parts. Using common parts across models provides big benefits to our support. Less variables, less confusing & lowered cost to our entire ecosystem. From a single tire & wheel assembly across all models to shared cooling packages, engines, hydraulics & electronics. Our close manufacturer & vendor relationships assure a smooth supply chain.
